

SaSy[®]

Sampling Syringe

Precision is a key factor for representative sampling, especially if the source is small or difficult to reach. With SaSy[®] sample-contamination by ambient water can be reduced.

Technical data

Length (empty):	ca. 350 mm
Length (reared):	ca. 600 mm
Sample volume (effective):	450 ml
Material:	PE / PTFE
Weight:	ca. 200 g

Supplied with three-way valve (olive, 6 mm) and 500 mm Teflon tube (PTFE).

Accessories

- Sample catcher
- Individual engraving
- Protection case
- Other sizes on request
